Education

University of Washington – Seattle, WA

Bachelor of Science in Construction Management

September 2023 – Current

Expected June 2026

Experience

Project Management Intern, MN Custom Homes – Bellevue, WA

June – September 2025

- Assisted in the management of high-end custom homes in various stages of construction, from foundation to final punchouts.
- Coordinated with subcontractors, suppliers, and inspectors to ensure efficient workflow.
- Performed takeoffs and managed project schedules.
- Conducted daily site walks for quality control; created punchlists and coordinated with vendors for remedy of punch items.

Program Mentor, Sawhorse Revolution – Seattle, WA

June 2021 – March 2024

- Coordinated teams of 10+ students to build community projects for non-profit organizations around the Seattle area.
- Mentored high school students on the conduct of the construction site, teamwork, and the safe use of power tools
- Assisted in managing social media accounts to promote active projects and increase community engagement.

Team member, ASC Reno competition, Concrete Solutions.

- Collaborated with a student team to develop a full project concrete proposal for a golf course visitor center addition.
- Produced a site logistics plan, preliminary estimates, and project schedule under competition deadlines.
- Assisted team captains with research, takeoffs, and presentation preparation.

Club member, American Concrete Institute, Washington Chapter

January 2025 – Current

- Participated in hands-on lab work to design and test concrete mixes. Collected data and improved on mix designs through iterative process.

Practical construction experience

- Shadowed residential contractor for 3+ years, gaining hands-on experience in residential remodeling.
- Developed skills in carpentry, remodeling, power tools, multi-tasking, and problem-solving in active job sites
